† Maximum copies per minutes (cpm) are measured after first page with text patterns in Draft Mode on plain paper. ISO ppm is based on ISO 24734. Black and color print speeds are determined in default, single-side mode, in accordance with ISO/IEC 24734. Color photo in Draft Mode on Premium Photo Paper Glossy measured from start of paper feed. Actual print times will vary based on system configuration, software, and page complexity. See www.epson.com/printspeed for details, including complete ISO reports.

†† Please visit www.epson.com for specific memory card compatibility.

1 Compared to ink jet, photo all-in-ones priced at $299 or less as of April 1, 2010, based on independent testing.

2 For sending faxes only.

3 Some applications and/or functions may not be supported by Mac®.

4 Wi-Fi 802.11 b/g/n certified; level of performance subject to the range of the router being used. Visit www.wi-fi.org/files/11nbasics_glossary.pdf for more information.

5 See www.epson.com/mobile printing for more information on optional phone applications.

6 User supplied cable required to fully or partially charge USB devices that comply with USB 2.0 standards, rated 500 mA or less.

7 Epson provides phone support, without charge, for the life of the product. Telephone toll charges may apply.

8 Display permanence based on accelerated testing of prints displayed under glass in indoor display conditions; album permanence based on accelerated testing of prints in dark storage conditions. Actual print stability will vary according to media, printed image, display conditions, light intensity, temperature, humidity and atmospheric conditions. Epson does not guarantee the longevity of prints. For maximum print life, display all prints under glass or UV filter or properly store them.

9 Yields based on ISO/IEC 24711 in default mode printing continuously. Actual yields will be lower with higher-density images, hot or dusty conditions, less frequent printing, or printing predominantly with one color. All ink colors are used for printing and all-in-one maintenance, and all colors have to be installed for printing. For print quality, part of the ink from the included cartridges is used for printer startup and a variable amount of ink remains in the cartridges after the "replace cartridge" signal. For details, see www.epson.com/cartridgeinfo

10 Calculated copying five sheets of A4-size color documents per day; one day defined as 8 hours with the power on and 16 hours with the power off. Power consumption will vary according to the customer's product usage. Based on a 2008 national average electricity cost of 11.47 cents per kWh.
